(54) STRAIGHT PIPE MADE FROM METAL MAINLY INCLUDING ALUMINUM,
MANUFACTURING METHOD THEREFOR, AND INSPECTION METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a straight pipe made from a metal mainly consisting of aluminum, which hardly generates deformation, breakage and the like, has a long-term durability under a high-temperature condition or an environment where the load of heat cycle is applied, can be drawn, and is inexpensively manufactured.

SOLUTION: This method for manufacturing the straight pipe is characterized by completely annealing a porthole straight pipe made from aluminum or an aluminum alloy by pressure welding.

LEGAL STATUS

[Date of request for examination] 30.01.2003

[Date of sending the examiner's decision of rejection] 26.10.2004

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
